

2026 Goal Plan – Business Outcomes

BTS - Business Outcomes : Achieve or exceed your 2026 financial plan, including IPL-defined revenue and OI targets.

Key Activities:

- Lead technical discovery, solution design, demos, and validation activities that advance opportunities.
- Remove technical blockers and influence solution direction to increase win rate and deal velocity.
- Maintain accurate forecasting, territory plans, and pipeline documentation with clear technical notes.
- Identify new technical workloads and collaborate with Sellers and CSMs to convert signals into pipeline.
- Support deployment and early adoption to ensure customers achieve time-to-value quickly.
- Engage Business Partners to accelerate opportunity progression and scale coverage.

Measures of Success:

- **Revenue attainment**
- Increased deal velocity and improved technical win rates.
- High quality and timeliness of technical documentation, forecasting, and opportunity hygiene.

CSM - Business Outcomes : Drive customer value, product adoption, renewals, and expansion opportunities to deliver assigned revenue and OI targets.

Key Activities:

- Monitor usage, adoption, and customer health; identify risks early and execute remediation actions.
- Lead structured Executive Business Reviews highlighting value realized and future-value opportunities.
- Convert adoption signals into expansion pipeline by routing opportunities to Sales and Technical teams.
- Drive renewal readiness by proactively managing risk indicators and communicating value delivered.

Measures of Success:

- Achievement of adoption, renewal, and expansion performance targets.
- Reduction of customer risk occurrences and improved account health.
- Increased expansion pipeline creation sourced from Customer Success.

2026 Goal Plan – Skills Development.

BTS - Skills Development : Deepen technical expertise, architectural capability, and communication skills to drive customer confidence and accelerate sales cycles.

Key Activities:

- Complete 4 L3 and 1 L4 certifications in the assigned technical specialty.
- Master product roadmaps, competitive positioning, common architectures, and integration patterns.
- Produce clear, reusable technical assets—diagrams, POVs, patterns, demo scripts—for internal and external use.
- Strengthen technical storytelling, linking architecture decisions to customer business outcomes.
- Mentor peers and collaborate across teams to elevate overall technical capability.

Measures of Success:

- Completion of certification requirements.
- Enhanced technical credibility demonstrated in customer engagements.
- Increased usage of your technical assets by peers and Business Partners.
- Positive feedback on clarity and leadership in technical conversations.

CSM - Skills Development : Enhance product knowledge, technical awareness, and leadership communication to elevate customer impact and team capability.

Key Activities:

- Complete 4 L3 and 1 L4 certifications aligned to assigned product portfolio.
- Build deeper understanding of product capabilities, use cases, and integration basics.
- Participate in ongoing product enablement and maintain current knowledge of new features and releases.
- Strengthen meeting leadership by framing agendas, guiding customer conversations, and aligning teams to outcomes.
- Contribute to team learning through best-practice sharing and peer coaching.

Measures of Success:

- Completion of required certifications within target timelines.
- Demonstrated improvement in technical confidence and value storytelling in customer meetings.
- Consistent contribution to team enablement and knowledge sharing.

2026 Goal Plan – Behaviors Outcomes.

BTS - Behaviors Outcomes : Model IBM leadership behaviours by simplifying complexity, collaborating transparently, and driving clarity and momentum in customer engagements.

Key Activities:

- Provide clear and structured technical guidance that accelerates customer decision-making.
- Partner openly with Sales, CSMs, Partners, and Architects to ensure seamless, frictionless collaboration.
- Display calm, structured leadership in high-stakes technical discussions or escalations.
- Maintain high standards of discipline in forecasting, communication, and preparation.
- Contribute to a culture of coaching, learning, and shared success.

Measures of Success:

- Positive feedback from stakeholders on partnership, leadership, and technical clarity.
- Demonstrated ability to influence and accelerate outcomes collaboratively.
- Consistent, high-quality communication and preparation.
- Measurable improvements in team capability through your mentorship and contributions.

2026 Goal Plan – Behaviors Outcomes.

CSM - Behaviors Outcomes : Exemplify IBM leadership behaviours by fostering strong collaboration, clear communication, and a proactive customer-focused mindset.

Key Activities:

- Demonstrate ownership of customer outcomes through proactive risk management and follow-through.
- Communicate clearly and concisely with internal and external stakeholders.
- Engage cross-functional roles early to ensure seamless customer experiences.
- Share insights, learnings, and best practices to strengthen team performance.
- Maintain consistent discipline in data hygiene, planning, and execution.

Measures of Success:

- Positive stakeholder feedback on collaboration, communication, and reliability.
- Strong alignment with Sales, Technical, and Partner teams.
- Consistent adherence to data hygiene and planning processes.
- Demonstrated leadership during customer escalations and critical moments.
